Space Continuum

I am fascinated by information technology and the way we share information today. The album is based on information from the Internet, written and shared by the community. Inspired by scientific theories and hypotheses the lyrics revolve around facts and definitions from atoms to the universe, peppered with clichés from science fiction. This makes the essence of Space Continuum.

Space Continuum is inspired by the 70 - and 80-century space disco, also known as a sci-fi disco and cosmo-rock mixed with other sub-genres.

The album is 73 minutes and includes 29 songs.

Enjoy!
Termodress

THANKS TO

Inger Hilde - for your love and support

Ludwig - for your happiness and patience

Thomas Bøen Alme - for believing in me and my projects

Hannes Wingate - for inspiring me to compose electronic music

Fredrik Saroea - for enthusiasm and good advice

Andreas Nordenstam - for excellent mastering

And many thanks to my family, my friends & colleagues

«In physics, spacetime, is any mathematical model that combines space and time into a single continuum»

«The Big Bang theory is the prevailing cosmological model that explains the early development of the Universe»
